DETAILED ACTION

Allowable Subject Matter

13. Claims 1 – 4 are allowed. The following is an examiner's statement of reasons for allowance: Prior art does not teach a vibration system comprised of an inner and outer mold providing an annular space into which concrete is introduced, of which the inner mold has a vibratory assembly with a shaft consisting of mounting plates and upper and lower vibrator plates secured to the upper and lower ends, further consisting of vibrator assemblies on both ends of the shaft which includes a drive motor, the vibrator assemblies being positioned within the interior space of the mold. There are many examples of vibrator assemblies for the formation of concrete pipes; however, either the assembly lacks both mounting plates and vibrator plates and the position of *two motors on each end of the shaft, within the interior of the mold.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
